Zona INTRA, Avda. Jardín Botánico,
1345, 33203 Gijón, Asturias

Description

Selective laser sintering machine with polymers, designed to achieve the cost-effective production of small and individual series and products with complex geometries.

Uses and applications

Used to manufacture plastic components in prototypes and in series manufacturing.

Equipment classification

Demo units.

Associated services

- Technical feasibility analysis of component manufacturing using additive manufacturing technologies.
- Preliminary tests on new additive manufacturing processes.
- Preliminary feasibility study for the development of new materials for additive manufacturing.
