## Description

FLEXIBLE PRINTED ELECTRONICS, pilot roll-to-roll line used to manufacture functional high-tech products with low-cost flexible substrates.

## Uses and applications

Roll-to-roll manufacturing is currently being implemented to manufacture the following products: lighting and signalling (LED, OLED and EL), photovoltaic, electro-chemical sensors, fluid systems, flexible optical systems, smart labelling, RFID, etc. This line can be used to design tailored products and analyse the feasibility of their mass production.

## Equipment classification

Pilot plant.

## Associated services

Feasibility study on the sensorisation of complex processes.

## Equipment code

N2.18

## Service code

E.19
