## Description

Ceramic 3D printing, using LCM technology based on the photopolymerisation principle.

## Uses and applications

Used to manufacture ceramic components, such as alumina or zirconia. Used for prototyping and series manufacturing applications, among others.

## Equipment classification

Demo units.

## Associated services

- Technical feasibility analysis of component manufacturing using additive manufacturing technologies.
- Preliminary tests on new additive manufacturing processes.
- Preliminary feasibility study for the development of new materials for additive manufacturing.
