1345, 33203 Gijón, Asturias

Description

Printer that uses different materials for quick prototyping applications, guaranteeing that products are very similar if not almost identical to the finished product.

Uses and applications

3D printing unit used to manufacture photopolymer resin, in rigid materials and for rubber, and for different applications, such as prototyping and proof of concept tests.

Equipment classification

Demo units.

Associated services

- Technical feasibility analysis of component manufacturing using additive manufacturing technologies.

Equipment code

N1.11

Service code

E.3
