 **Contact**  
Investigador responsable:  
Pablo Arboleya  
arboleyapablo@uniovi.es

 **Location**  
Escuela Politécnica de Ingeniería de Gijón  
Edificio Departamental, número 4  
1ª planta. Laboratorio 4.1.09.  
Campus Universitario de Gijón  
33203, Gijón (Asturias)

## Description

Pilot IoT system (city level), which features IoT nodes and Gateways, in addition to a street light management system.

## Uses and applications

Applications for the small-scale reproduction of the existing IoT networks in Gijón, used to design pilot training and data analysis projects.

## Equipment classification

Pilot plan.

## Associated services

- Expert advice on digital technologies for applications and services for Smart Cities.
- Proof of concept for smart city technologies.
- Training in open source IoT technologies for Smart Cities.

## Equipment code

N2.38

## Service code

A.6  
E.7  
F.2
