## Description

Mobile infrastructure, made up of 8 virtual reality units with digital twins in the Industri4 Lab demo unit and Well-being and Active Ageing Laboratory.

## Uses and applications

Demonstration and testing the degree of digitisation of any industrial process and any field of healthcare. These companies can have a hands-on experience with the virtual and augmented reality, blockchain and IoT intelligence demonstrations held at the CTIC's headquarters.

## Equipment classification

Demo units.

## Associated services

Proofs of concept for experimentation in technologies for Industry 4.0 through Immersive Technologies (Virtual Reality, Augmented Reality, Mixed Reality or Immersive Web).

## Equipment code

N2.9

## Service code

E.24
